

Technical Specification Sheet

**MRTA8 Single Circuit** (VSL27)

[545kg]

Tilt, rotate and manoeuvre dense stone slabs with the MRTA8 vacuum lifter.

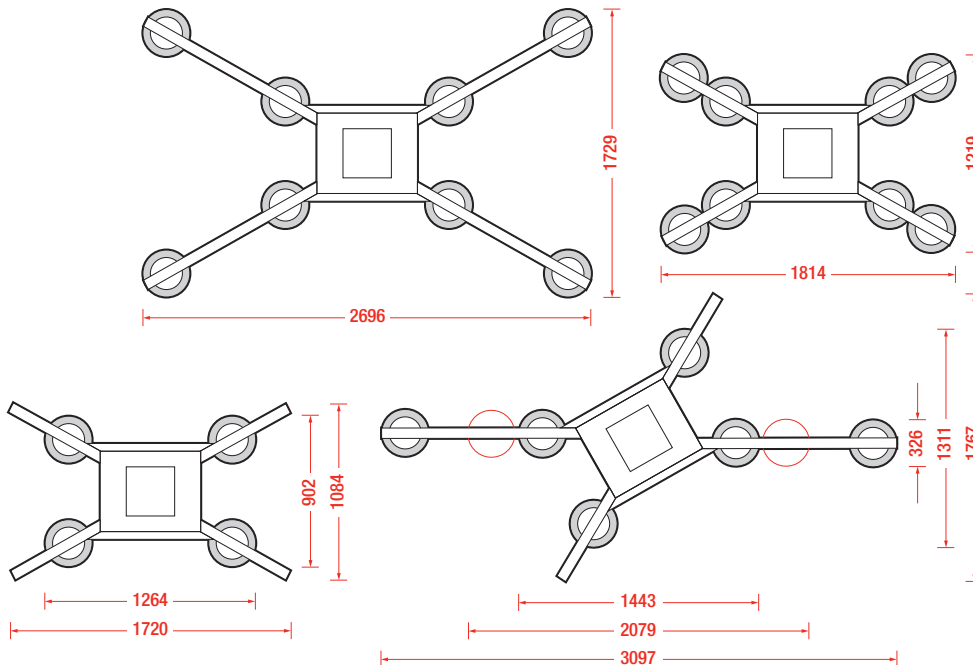

Boasting unique 'Quadra-Tilt' technology, the MRTA8 offers mechanically assisted tilting of dense stone from upright to horizontal position.

Stone slab panels can also be continuously rotated 360° into their ideal position, saving the strain of heavy manual handling.

**Features**

- 545kg lifting capacity
- Mechanically assisted tilting from vertical to horizontal
- 360° continuous rotation
- On-board vacuum pump
- Pad positions can be isolated
- Mains powered
- 240v AV constant running pump
- 8 x 280mm Ø foam lipped vacuum pads
- Weight of lifter: 140kg
- Audio-visual low pressure alarm

**Dimensions**
