

Shop Front Glazing Ma

Glass Sherpa [300 or 400kg]

Avoid the stress and strains of handling heavy loads with the ground-breaking Glass Sherpa trolley.

This revolutionary trolley is capable of carrying up to 300 or 400 kg and makes glass transportation and installation effortless with its 360° rotation function. Thanks to the Glass Sherpa only two people are required to transport heavy double glazed or large format glass safely.

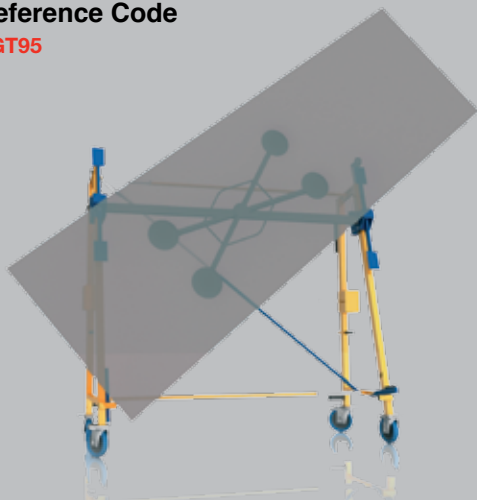

Collapsible and highly portable, the Sherpa's height-adjustable suction system allows glass to be lifted onto or off the side of a van, wheeled safely into position and installed — an ideal for shop front glazing.
