

Radio remote control as standard

Technical Specification Sheet

Power Tilt ^[VSL85]

The Power Tilt lifter is ideal for safely moving materials up to 360kg with minimal manual handling required.

This practical lifting aid has a 90° powered tilt function for easily moving loads from horizontal to vertical position.

The below-the-hook Power Tilt device is battery powered and can be mounted to a crane for lifting and transporting loads in factories or workshops. Features a constant running single circuit vacuum system.

Optional pad sizes available.
